Cover photo: Giant king fish (*Caranx ignobilis*) gather in preparation for a unique migration up the Mtentu river. The Mtentu river is one of few remaining pristine wildernesses in South Africa, so the Africa crew avoided using disruptive motor boats, instead paddling to the location each day in a canoe. Image elaborated by Cornelia Stancu.

Table of Contents

Preface	iii
Introduction	1
Rivers, Where Humankind Meets Nature	7
Rivers of civilisation	23
Case Studies	35
Dugouts from North Patagonia (center-south of Chile): Sailing on Trees	37
Nicolás Lira S.	
Exploitation of the Aquatic Resources of Lake Lubāns and Its Hydrological Regime during the Stone Age	51
Ilze B. Loze	
A River Runs Through It: the Semiotics of Göbekli Tepe’s Map (an Exercise of Archaeological Imagination)	65
Dragoş Gheorghiu	
Rivers, Human Occupation and Exchanges Around the Late Bronze Age Settlement of Frattesina (ne Italy)	77
Paolo Bellintani and Massimo Saracino	
People of the Waters in Northern Italy	89
Andrea Vianello	
The Perennial Rivers and the Changing Settlement Patterns on the Two Sides of the Tiber in Central Italy – the Case Studies of Nepi and Gabii	103
Ulla Rajala	
Bronze Age Barrow Complexes on the Lincolnshire Fen Margin	125
Peter Chowne	
Roads, Routes and Ceremonies: the Fenland Superhighway	137
Tim Malim	
Continuity of Seasonal Access and Occupation on the Turloughs of Ireland	151
Amy Bunce	
An Approach to the Fluvial Networks of the Papaloapan Basin: the Use of the Lower Papaloapan, México, from the Pre-hispanic Period to Early Xx Century	159
Edith Ortiz Díaz	
List of Authors and Contacts	166

List of Figures

Rivers, Where Humankind Meets Nature

Fig. 1: Raised fields in the Karouabo area, central coast of French Guiana.....	12
Fig. 2: Stelae shrines at Areshima Jinjya.	14
Fig. 3: Mitarai pond (投稿者自身による作品).....	15
Fig. 4: Waterfall, Togakushi shrine (戸隠神社さざれ滝).....	15
Fig. 5: Togakushi-daimyoujin shrine.	16
Fig. 6: Shrine possibly connected with river, Rikuzentakata, Iwate Prefecture.	16
Fig. 7: Kamishikimi Kumano shrine.	17
Fig. 8: Kumano shrine, near hot springs and confluence of rivers Kumano, Otonashi River and Iwata, “Kumano Kodo” World Heritage site.....	18
Fig. 9: Seoritsu-hime shrines (total 454 as of 5/2008), distribution.....	19
Fig. 10: Seoritsu-hime shrine near bridge.....	20
Fig. 11: Sacred tree at Mishima Jinjya.....	20
Fig. 12: Horseshoe bend, Colorado River.	21

Rivers of civilisation

Fig. 13: Nile River Delta at Night, ISS025-E-9858, NASA.....	24
Fig. 14: Nile River flooding the fields, near Al Uqsur, with view of the desert, Egypt..	24
Fig. 15: Nile River flooding fields.....	25
Fig. 16: Cairo and district, Egypt. Pyramids at sunset. Silhouette effect showing the flood time of the Nile, ca. 1934.. ...	25
Fig. 17: Egypt. Cairo. Evening scene of Nile overflow near pyramids, 1936.....	26
Fig. 18: Egypt. Village and pyramids during the flood-time, ca. 1890s.....	26
Fig. 19: The Temple of Gerf Hussein at New Kalabsha (Talmis)..	27
Fig. 20: Tigris River. Photo by Tadaram Alasadro Maradas.....	28
Fig. 21: Euphrates River by Dura-Europus, Syria.....	28
Fig. 22: View of the Danube.....	29
Fig. 23: Modern floods caused by Danube.	30
Fig. 24: Indus River.	31
Fig. 25: Yangtze. Photo by Flickr user Stanley Zimny.....	33
Fig. 26: View of the first bend of the Yangtze..	33

Case Studies

Dugouts from North Patagonia (center-south of Chile): Sailing on Trees¹

Fig. 1. Map of the region showing the place of the findings of dugouts mentioned in this research. By Valentina Figueroa 2010.....	38
Fig. 2. Photograph taken by Rodolfo Knittel in Puerto Nuevo, Lake Ranco between 1934-1936. It corresponds to the first of a three photographs serie. Two women and a man, all of them mapuche, are rowing on a dugout. It's possible to distinguish the way of rowing from stern with a long row.	40
Fig. 3. Map of routes that has been posible to reconstruct in the region. By Valentina Figueroa 2010.....	41
Fig. 4. Detail of routes in lake Budi, lake Ranco and lake Lacar. By Valentina Figueroa 2010.....	42
Fig. 5. .Mapuche dugout on a bank with its tripulation inside. Taken by the photographer Valck of Valdivia in 1870. Particular Collection of Alvaro Besa.	43
Fig. 6. Photograph taken by Rodolfo Knittel in Puerto Nuevo, Lake Ranco, in 1934.	47

Exploitation of the Aquatic Resources of Lake Lubāns and Its Hydrological Regime during the Stone Age

Fig. 1. Map of distribution of Stone Age settlements in Lake Lubāns Wetland.....	52
Fig. 3. Water level changes of Lake Lubāns. 1- water level fluctuations of Lake Lubāns, 2- curve showing changes of the lake water level in Holocene, 3- possible interval of lake water level fluctuations, 4- maximum level, 5- transgressions, 6- radiocarbon datings (Eberhards, 1985).	54
Fig. 4. View to the Zvidze settlement from South- east. Foto Juris Urtāns.....	54
Fig. 5. Zvidze multilayer settlement- eastern profile (Late Mesolithic, Early and Middle Neolithic layers) of the excavation unit C.	55
Fig. 6. Plan of the the fishing weir in excavation unit B.	55

Fig. 7. View to the fishing weir s poles from South- west.	56
Fig. 8. Remains of fish – creal of the western part of fishing weir.	56
Fig. 9. Middle Neolithic ichtyofauna of settlement Zvidze(after Sloka, 1986).....	57
Fig. 10. Middle Neolithis avifauna of settlement Zvidze.(after Strazdina 1986).....	58
Fig. 11. View to the Abora settlement from South.	59
Fig. 12. Geomorphological profile of Late Neolithic Abora I settlement.....	59
Fig. 13. Fishing creel in situ in lower part of Abora I settlement.	60
Fig. 14. View to the creel s mouth of Abora I settlement.	60
Fig. 15. Late Neolithic ichtyofauna from Abora I settlement (after Sloka, 1975)	61
Fig. 16. Late Neolithic avifauna from Abora I settlement, (after Strazdina, 1986)	61

A River Runs Through It: the Semiotics of Göbekli Tepe’s Map (an Exercise of Archaeological Imagination)

Fig. 1. Enclosure D with T-shaped monoliths (after Schmidt 2012: 160, fig.76).....	66
Fig. 2. Pillar 2, Enclosure A (after Schmidt 2012: 117, fig.46).....	68
Fig. 3. Pillar 33, Enclosure D (after Schmidt 2012: 179, fig.91).....	68
Fig. 4 Pillar 33, Enclosure D.....	69
Fig. 5 Pillar 20, Enclosure D (after Schmidt 2012: 167, fig. 83).....	70
Fig. 6 Pillar 43, Enclosure D (after Schmidt 2012: 245, fig. 107).....	70
Fig. 7 The Jordan River at the junction with the Dead Sea. Photo by Simina Stanc.	71
Fig. 8. The Madaba Map, a) the original mosaic and b) a modern interpretation with very clear details at the right. Photo by Dragos Gheorghiu.....	72
Fig. 9. Vadastrita River, South Romania. Photo by Alexandra Rusu.....	72

Rivers, Human Occupation and Exchanges Around the Late Bronze Age Settlement of Frattesina (ne Italy)

Fig. 1. Topographic sketch of the area discussed with indication of the hypothetical Late Bronze Age palaeo-hydrography.....	78
Fig. 2. Aerial photo interpretation of the area surrounding the “villaggio arginato” of Castello del Tartaro (De Guio <i>et al.</i> 2009).	79
Fig. 3. Distribution of the main amber and glass beads during Final Bronze Age (after Cultraro 2006; Negroni Cattacchio <i>et al.</i> 2006; Bellintani 2011; modified by M. Saracino).	81
Fig. 4. Selection of artefacts from Frattesina: 1) “Luco A” potsherd from a biconical pot (drawn by M. Saracino), 2) ivory comb, 3-4) Italo-Mycenaean pottery.	82
Fig. 5. Distribution of Final Bronze Age metal artefacts: Ponte S. Giovanni axe, pick-shaped ingot, and “socketed shovel” (after Bellintani, Stefan 2008).	83

People of the Waters in Northern Italy

Fig. 1: Map with the distribution of Neolithic sickles, one type present at all sites (full dots), another type present at some sites (half filled dot). Sites: 1) Torre Sabea; 2) Favella della Corte; 3) Trasano; 4) Coppa Nevigata; 5) La Starza; 6) Ripa Tetta; 7) La Marmotta; 8) Arene Candide; 9) Peiro Signado; 10) Guixeres de Vilobí.	90
Fig. 2: Map showing spatial distribution of pile-dwellings inscribed onto UNESCO World Heritage List.	90
Fig. 3: Map showing lake-dwellings dated between Neolithic and Bronze Age. Only pile-dwellings on lakes included....	91
Fig. 4: Reconstruction of pile-dwelling by Jakob Messikomer, around 1867.	92
Fig. 5: Bone fishing hooks from Lake Neuchâtel.	92
Fig. 6: Bone and wood ornaments from Robenhausen.	93
Fig. 7: Wood piles at Fivè.	94
Fig. 8: Wood piles at Fivè.	94
Fig. 9: Map of the moated site of Fabbrica dei Soci (Verona); embankments deviated the river to form the moat.	95
Fig. 10: Tracing of rock 1 at Bedolina, also known as Bedolina map.	96
Fig. 11: Roman funerary monument found at Cala Molino alla Maddalena in the lagoon of Venice, June 1837. From the notes by G. Casoni. Manuscript Cicogna, n. 3344, sheet 329..	97
Fig. 12: Rio di San Felice, Venice: foundation piles.	98
Fig. 13: Rio di Santa Marina, Venice: foundation piles.	98
Fig. 14: Foundations of wall at the Arsenal of Venice dug in 1824. From the notes by G. Casoni. Manuscript Cicogna, n. 3344, sheet 157.	99
Fig. 15: Foundations under Piazzetta San Marco, Venice, as drawn during restoration works in the 19th century. After Ongania, F. 1881. Dettagli di altari, monumenti, scultura ecc. della Basilica di San Marco in Venezia, 1, tav IX, n. 40. Photo	100
Fig. 16: Watercolor by G. Grevembroch, 18th century, showing two people in the act of driving into the ground	

wooden piles with a “pile hammer”	101
-----------------------------------------	-----

The Perennial Rivers and the Changing Settlement Patterns on the Two Sides of the Tiber in Central Italy – the Case Studies of Nepi and Gabii

Fig. 1. The map of central Italy (with the main sites in the text).....	104
Fig. 2. The survey units in the territory of Nepi (with the main place names).....	105
Fig. 3. The perennial rivers in the Nepi area (with the main Bronze Age and Iron Age centres).....	106
Fig. 4. The perennial rivers in the Gabii area (with the reconstructed lakes).....	107
Fig. 5. A. Nepi and the ravine photographed from Castel Sant’Elia. B. The upper town of Gabii across the valley of the former Lago di Castiglione (photographs by U. Rajala).	107
Fig. 6. The find densities in the Nepi Survey Project. A. The weight density distribution of flints. B. The weight density distribution of prehistoric pottery. C. The weight density distribution of Archaic and Orientalizing pottery. D. The density of Roman pottery.	110
Fig. 7. A. Down in a ravine by the perennial river. B. The paved Roman road from Massa into the river valley and towards Castel Sant’Elia.	111
Fig. 8. Road cuttings in the Nepi area.	112
Fig. 9. A. Visibility from the Final bronze Age Il Pizzo. B. Visibility from the Iron Age Nepi.....	114
Fig. 10. Road cuttings into the river valleys and river crossings in the Nepi area.	115
Fig. 11. Casale del Pescatore and the Neolithic sites in the Gabii area.	116
Fig. 12. Archaic centres and rural sites in the Gabii area.	116
Fig. 13. Visibility from the sites at Gabii (after Rajala 2004, fig. 3). A. From the Neolithic Casale del Pescatore. B. From the Middle Bronze Age Castiglione. C. From the highest point of the northern area. D. From the highest point of the lower town in the south.	117
Fig. 14. A. The settlement in the Gabii area between the Chalcolithic and Early Bronze Age. B. The Middle Bronze Age settlement.	118
Fig. 15. The distance from the perennial rivers to the Archaic rural settlements in the Gabii area.	119

Bronze Age Barrow Complexes on the Lincolnshire Fen Margin

Fig. 1. Distribution of round barrows and study areas, B/S Barlings/Stainfield, T/TT Tattershall/Tattershall Thorpe, contours at 50 m.	126
Fig. 2. Western Fen Margin: the light tone at the bottom of the image marks lower ground as the land slopes down in to the fenland basin.	127
Fig. 3. Kyme Embayment: the ancient course of the River Witham is the lighter tone running diagonally across the top right corner of the image.....	130
Fig. 4. Witham Valley: the levees/sandbanks are clearly visible, ancient courses of the River Witham are marked by the darker tones.	132

Roads, Routes and Ceremonies: the Fenland Superhighway

Fig. 1 A succinct typology for timber structures based mainly on examples excavated from East London (Barking, Beckton, Dagenham see Meddens 1996) and the Fens.....	139
Fig. 2 A map of the Fenland region showing principal sites mentioned in the text and major routeways through the area (© Caroline Malim)	142
Fig. 3 The Flag Fen basin: recent discoveries. Top left: Air photograph of Cambridge Archaeological Unit’s excavation at Kings Dyke West (© Ben Robinson) with drawings showing relationship of henge and Fen Causeway. Base left: planks with mortise holes, the horizontal component, from Fengate Power Station site 1989 (Tim Malim). Main map: © Cambridge Archaeological Unit showing main areas of excavation, fen edge uplands and western end of Whittlesey island, and Flag Fen basin, with Fen Causeway zone superimposed.....	143
Fig. 4 Map of eastern England showing fens and major prehistoric routeways. Top right: Beloe’s map of the Fen Causeway published in 1893	146
Fig. 5 Main picture shows the medieval causeway and bridge over the Great Ouse at St Ives, with chapel half-way across (© Ben Robinson). Top left: air photograph from north east over Flag Fen looking towards Fengate; the light line is the line of the (Roman) Fen Causeway (© Ben Robinson). Base left: hoard of bronze axes from Eldernell (Tim Malim).....	147

Continuity of Seasonal Access and Occupation on the Turloughs of Ireland

Fig. 1: Carran, Co. Clare. Dry turlough basin surrounded by the karst limestone pavements of the Burren. Carran, perhaps the best known turlough within Ireland, is actually on relatively high ground whereas most turloughs form in low-lying areas.	151
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

Fig. 2: Crannog situation in Co. Galway.....	154
Fig. 3: Rahasane, Co. Galway. Algal layer and moss coated boulders visible with the retreating turlough flood. Cloghincha crannog is perceptible in the centre as a tree covered island.....	155
Fig. 4: Cloghincha crannog on Rahasane turlough, Co. Galway. Canalisation across the turlough is evident in the foreground and the remaining flood filling the lowest parts of the turlough basin is discernible beyond the crannog. The stones forming part of the crannog construction are visible beneath the trees and well below the full-flood level.	155
Fig. 5: A suggestion as to a turlough crannog's use as a meeting place and trading centre with the crannog formalising the space and giving a winter time presence or back up option in the case of high summer floods as appears to be the case here. Illustration by Geoff Bunce.	156

An Approach to the Fluvial Networks of the Papaloapan Basin: the Use of the Lower Papaloapan, México, from the Pre-hispanic Period to Early Xx Century

Fig. 1. The Papaloapan River Basin	160
Fig. 2. Man diving a canoe or <i>Cayuco</i>	160
Fig. 3. Canoes or <i>Cayucos</i> of different sizes	161
Fig. 4. The use of canoes or <i>Cayucos</i> to cross the Papaloapan river close to Tuxtepec, Oaxaca.	164
